FinSage

AI-Powered Financial Research Report Generator

GITHUB

Professional stock research reports cost **thousands of dollars** and take analysts **weeks** to produce. FinSage generates the same **15–20 page report in under 7 minutes** — fully automated, using AI.

<7 Minutes to full report	15-20 Page branded PDF output	8 AI-refined chart types	4+ AI models collaborating

HOW IT WORKS

1 Collect Data

Stock prices, financials, news & SEC filings from 5 sources

Yahoo Finance · NewsAPI · SEC EDGAR

→

2 Analyze with AI

4 AI agents collaborate — charts, validation & analysis

Like a team of analysts, automated

→

3 Generate Report

Branded PDF with 8 charts, analysis & citations

Goldman Sachs-style, fully automated

What You Get

- 8 AI-refined charts
- AI-written analysis
- SEC filing insights
- Full citations
- Branded PDF theme
- AI safety guardrails

What Makes It Unique

1. AI Improves Its Own Charts

Generates charts, critiques them with AI vision, and refines — like an analyst reviewing their own work 3 times.

01 **Generate** AI creates chart → 02 **Critique** Vision AI reviews → 03 **Refine** Improved output

2. Chain-of-Analysis Pipeline

Each AI agent builds on the previous one's output — Chart → Validation → Analysis → Report — creating a layered, verified chain of reasoning with no single point of failure.
